

POWERVOTE BESPOKE SOLUTIONS

PowerVote is a solution that also adapts to your specific needs!

Should you have a specific requirement that cannot be fully answered by Powervote Express or Quizz, we will listen to your project and offer you a solution that fulfills all your expectations.

POWERVOTE NET QUIZZ

Our Internet Solution allows you to evaluate groups of participants (partners, distribution networks, consumers) of from 10 to 10,000 people.

PowerVote Net Quizz handles everything:

integration and programming, integration of participant lists, sending of e-mail invitations, and monitoring of completed sessions. Vote analysis is then carried out via PowerVote Net Report.

POWERVOTE NET REPORT

The PowerVote system's summary tool which uses a dedicated Internet server, Net Report, gathers and processes quiz results transmitted via the Internet (PowerVote Net Quizz), as well as the results of all other PowerVote programmes.

PowerVote Net Report allows for a large number of analyses and summaries (individual reports, group reports, success statistics, thematic statistics) and thereby constitutes a complete result-reporting tool. In just one click, the generated data are also directly exploitable via Microsoft Excel.

POWERVOTE GAMES

PowerVote games (snakes and ladders, circuit racing, territorial conquest games, etc.) lend excitement to your events, strengthen your teams, and motivate the participants of your seminars and training sessions.

Their voting keypads in hand, your participants or teams face off via circuits strewn with pitfalls and rich in multimedia (videos, sound effects, music, etc.)

Any atmosphere is possible, either by choosing from our catalogue or creating your own game.

Compatible with:
