

EDUCATION

PowerVote

Today's students demand that their educational environment integrates the digital tools of the 21st century and adapts to their modern way of life.

New interactive tools allow instructors to better exploit the potential of each individual student, while encouraging participation and teamwork. PowerVote is a necessary tool to create an educational environment turned towards the future.

THE ADVANTAGES OF POWERVOTE

Favour student participation, while benefitting from an instantaneous evaluation.

The more your students participate, the more they learn:

- Tests and evaluations are more fun and dynamic.
- PowerVote makes it easier for shy students to participate.
- If a certain lesson has been poorly understood, it will be immediately detected, allowing you to return to the more difficult points while they are still "warm"
- Struggling students are discreetly identified, allowing you to, together, elaborate individualised programmes.

PowerVote Smart and Easy Systems are available as packages of 30 or more keypads that are easy to transport and share among instructors.

POWERVOTE : SIMPLE AND EFFECTIVE

Wireless: radio technology that functions without any implementation constraints, contrary to infrared systems.

Ergonomic: resistant, compact, light, very thin, LCD screen to visualise one's vote*, etc.

Identification: each voting keypad has its own ID number.

Secure radio transmission: FHSS (Frequency Hopping Spread Spectrum)

Certification: EC and FCC

Guarantee: 1 year

Support and assistance: free**

PowerVote can be installed in only 1 minute, to be immediately operational! A compact solution weighing less than 1 kg.

Take it anywhere!

- From 30 or more individual voting keypads (Smart or Easy Systems).
- 1 USB receiver that is Windows compatible (no pilot needs to be installed).
- The PowerVote Quizz software programme (Express version for the PowerVote Easy System).

* Only available for the PowerVote Smart System.

** During the first 3 months following the date of delivery of your PowerVote Smart System.
